

Green Motion SA is a Swiss company that for the last ten years has been pioneering the design and production of charging systems for electric vehicles.

It manufactures charging stations, designs management software for charging networks, operates charging stations and is a service provider for electric mobility. Our software solution enables us to manage and monitor charging stations networks in real time.

Green Motion SA operates its own network of charging stations under the "evpass" banner as the most extensive Swiss network and one of the leading European networks. For more information about Green Motion SA go to: www.greenmotion.ch

To strengthen our passionate software team in Le-Mont-sur Lausanne, we are looking for a :

SOFTWARE DEVELOPER

Within a 8 developers team, you will play a key role in the renewal of our software solution to a pure cloud-native SaaS application composed of multiple services, in order to deliver extensive features for our world-wide customer and bring our software solution to its next stage of evolution.

Key responsibilities

- You will be a main actor working on the entire applications lifecycle, from concept to release on the cloud. Most of your responsibilities will be around our backend applications, but sometimes you might also need to work with the frontend applications or the cloud infrastructure.
- Being a team player and collaborate with a highly skilled team of developers working in agile mode.
- Ensure quality of applications by applying state-of-the-art development methodologies like architecture, automated testing, or code reviews.
- Ensure level 3 support (rotating within the team).

Our technology stack

- Backend: .NET, .NET Core, Entity Framework
- Frontend: Angular, ASP.NET MVC
- Databases: Microsoft SQL Server, PostgreSQL
- Infrastructure: AWS EC2, ECS and Docker
- Organizational tools: GitLab, JIRA, Confluence

Smarter Electric Mobility Solutions

About your profile

- Minimum 3 years of experience in developing applications with Microsoft technologies, preferably web applications
- Good understanding of containers and orchestration
- Comfortable with Domain Driven Design and microservices approach
- Comfortable with agile practices and principles
- Open-minded and very positive can-do attitude
- Interest in electric mobility domain
- Ideally an experience with AWS on a SaaS solution
- Fluent English, French an asset
- BSc or MSc from a leading university or institute of technology

What we offer

- The chance to develop a global SaaS product in the great sector of electric vehicles
- A full-cloud agile environment with frequent releases and GitOps driven automated continuous integration and deployment
- An opportunity to work in an awesome, fast-scaling company with strong values
- A unique opportunity to contribute and bring your vision to our next-gen applications, used every day by thousands of ev-drivers (are you one of them?)
- A skilled and dynamic agile team where transparency, respect and teamwork are valued
- Competitive benefits package and free usage of our charging stations network
- Large terrace with barbecue, free coffee and fruits, and frequent afterwork gatherings.

Do you recognize yourself in this profile? Are you up for a new challenge?
We look forward to receiving your application.
